

# In skilled hands

Ensuring our specialist doctors are aware of new and evolving techniques means our valued patients are informed and able to have procedures, which incorporate the latest advancements. This means regular attendance at both national and international conferences in their speciality fields is a must.

Plastic Surgeon, **Mr Adam Bialostocki** attended the *Plastic Surgery Congress 2015*, in Brisbane earlier this month. Covering all aspects in the field of Plastic Surgery, it was a chance for Mr Bialostocki to remain in touch with the latest developments in this fast moving field.

**Dr Ben Tallon**, one of our two Dermatologists, will present three workshops at the *Melanoma*

*Summit 2015* in Auckland later this year - looking at difficult cases of melanoma, both clinically and histologically.

Nursing in the plastic surgery and dermatology fields requires specific skills and training on top of Registered Nursing qualifications. In order to ensure our wonderful team of nurses are in touch with the very latest techniques and knowledge available, they regularly attend conferences and workshops. The *Plastic Surgery Nurses Symposium* is next month, and Nicole will attend the *Non-Surgical Symposium* for advanced injectors in Melbourne, also in June. Looking ahead to August, the dermatology nurses are off to a conference specifically dealing with their specialty field of interest.

**MR ADAM BIALOSTOCKI**

*Cosmetic & Reconstructive Plastic Surgeon MBChB FRACS (Plastic)*

**DR BEN TALLON**

*Dermatologist MBChB FRACP ICDP-UEMS*

## Appearance medicine treatments...

We have two appearance medicine nurses, **Nicole and Nicola** (pictured on right), who are available to perform subtle, rejuvenating and youth enhancing treatments, using the very latest techniques with internationally recognised products. We have an increasing number of men who also include these treatments into their regime - and why not? Remember all new patients will see one of our specialist doctors, free of charge, to advise on a treatment plan specific to your personal requirements and desired outcomes. **Call us to make a time - appointments are available on Mondays, Wednesdays, Thursdays and Fridays.**

## Reveal your youthful skin

**Over the cooler months** is the perfect time of year to address dull skin and pigmentation issues, often the result of the summer sun. Overseen by Dr Ben Tallon, the gentle TCA peel is a non-surgical facial rejuvenation involving three applications, one month apart. Reveal fresh new skin as a result of this controlled process. **\$500 for three treatments.**

## BIOSkin - for skin with simple needs...

Because our team of skin specialists deal daily with skin conditions that need to be managed and are often irritated or inflamed by generic over the counter products, we have developed our own range of products - **BIOSkin**.

Ingredients known to be detrimental to moisturisation such as sodium laureth sulphate and parabens, are not present in **BIOSkin** products, and they contain limited preservatives and

fragrances to avoid inducement of contact dermatitis.

**BIOSkin Cleanser & Makeup Remover** Gently removes excess oils, sunscreen & makeup. For all skin types. **300gms, \$25**

**BIOSkin Cream** For dry skin, eczema, psoriasis, burns, chafing & more! **450gms, \$25**

**BIOSkin Lemon Myrtle Cream**, Antibacterial, anti itch - perfect for bites, small sores & to repel annoying insects. **50gms, \$25** **new!**

- the answer you've been looking for!

- No needles
- No surgery
- No anaesthetic!
- No downtime
- Safe & affordable
- Minimal after effects
- Targets specific areas

## Add volume - where it counts!

Our appearance medicine nurses are loving the beautiful, natural results achieved by using the soft and malleable dermal fillers in the VYCROSS® Collection. VOLUMA® for restoring and enhancing facial volume; VOLIFT® for treating deeper facial wrinkles; VOLBELLA® for enhancing lips and filling fine lines. Treatments with these natural, hydrating products can last from 12 - 24 months. Consider the subtle and refreshing use of dermal fillers and Botox® before your lines are fully formed and deeply creased, and to ensure the change in your appearance is subtle.

Did you know?

In ancient Rome, plastic surgery started as a means to remove scars. People in Rome were afraid of scars on their back as it was considered shameful and depicted that a man had turned his back during the war. Hence, they would have their scars removed through ancient plastic surgery techniques.

**Have you had your annual skin check yet?**

Remember, **autumn and winter** are the ideal time to have this done...
